

Navigate GIS

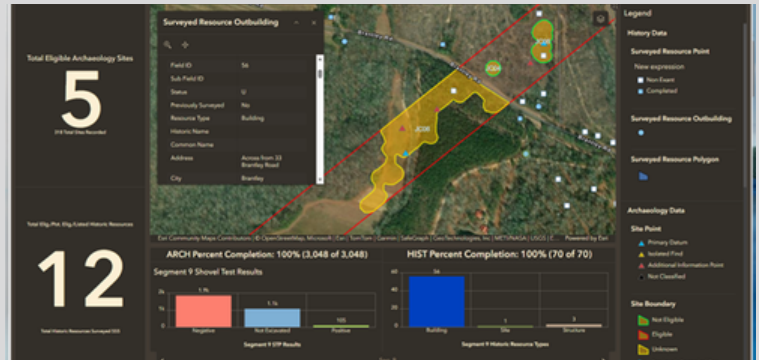

Real-Time Insight. Smarter Decisions. Better Outcomes.

We're excited to introduce Navigate — New South Associate's enterprise GIS solution designed to transform the way cultural resource survey projects are managed from start to finish.

Navigate is an innovative GIS database that streamlines your entire workflow while giving you something powerful: **real-time visibility into your project.**

**No more waiting for reports.
No more guesswork. Just clear,
up-to-date insights when you
need them.**

With Navigate, you can:

- **Monitor progress in real time** through a client dashboard that updates as data is collected
- **Make faster, more informed decisions** for utilities, road design, and project planning
- **Experience improved efficiency in fieldwork and reporting** with integrated QA/QC processes
- **Eliminate errors early** using automated error detection reports
- **Stay compliant** with automated site forms generated to meet state standards
